Experience

Dayal InfoSystems

Jul 2024 – Present

Software Engineer

Onsite (Meerut, India)

- **partnerPORTAL:** Architected GraphQL APIs and React dashboards, integrated QR-based payments and Ticketing; serving 5000+ customers as self-service platform, reducing manual support overhead.
- **License & Subscription Management:** Engineered a multi-tenant feature control system with timestamp-driven change propagation (Add/Modify/Delete) across distributed databases; built batch migration APIs to streamline subscription transitions at scale.
- **Stock Adjustment Module:** Implemented real-time inventory correction workflows, significantly improving stock accuracy and operational consistency across ERP.
- **Payment Tagging & Announcement Systems:** Boosted financial reconciliation accuracy via structured payment tagging; built a centralized announcement module unifying internal communication across all ERP users.

Apr 2024 – Oct 2024

Technical Content Writer

Remote (Freelance)

- Authored 10+ in-depth articles on MERN stack, REST APIs, Tailwind CSS, and modern frameworks, reaching thousands of developers on the platform.
- Crafted beginner-to-advanced tutorials with real-world use cases, bridging conceptual gaps and accelerating practical learning.

Projects

TimeSathi – Project Management & Ticketing System | PHP (Yii2), GraphQL, React, MySQL

- Designed and shipped a Jira-like module, now actively used by 100+ users for daily task tracking and delivery management also used for individual reports generation for appraisal.
- Built a full GraphQL API layer in Yii2 handling all queries and mutations, decoupling frontend from backend and improving iteration speed.
- Implemented RASCI-based responsibility model across Projects, Deliverables, Releases, and Ticketing modules – enabling clear ownership and cross-team accountability.
- Engineered configurable deliverable workflows with status transitions, approval gates, and effort tracking – replacing manual Excel-based processes entirely.
- Automated stakeholder email notifications on workflow events, reducing communication lag and improving delivery visibility.

FlavourFleet – Food Ordering Web Application | React.js, Tailwind CSS, Node.js, Express.js, MongoDB [GitHub]

- Independently built a production-ready full-stack food ordering app using MERN stack, covering end-to-end architecture, API design, and deployment.
- Secured the platform with JWT-based authentication and role-based access control for users and admins.
- Designed optimized MongoDB schemas and RESTful APIs for menu, orders, and user management; built a fully responsive UI using React and Tailwind CSS.

Technical Skills

Languages: C, C++, Python, JavaScript, PHP, HTML, CSS, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Yii2 (MVC), Bootstrap, Tailwind CSS, Redux

APIs & Protocols: RESTful APIs, GraphQL

Databases: MySQL, MongoDB

Message Brokers: RabbitMQ

Tools & Platforms: Git, GitHub, Postman, VS Code, Linux

Education

Bharat Institute Of Technology Meerut

Aug 2020 – Jul 2024

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.2 / 10)

Meerut, UP
