Experience

Dayal InfoSystems

Jul 2024 – Present

Software Engineer

Onsite (Meerut, India)

- **partnerPORTAL:** Architected GraphQL APIs and developed React-based customer dashboards serving 5,000+ customers. Built self-service workflows for orders, invoices, ledgers, ticketing, outstanding reports, and QR/bank-based payments integrated with ERP modules.
- **Bank Integration & ICE Platform:** Designed a reusable webhook-driven integration platform using RabbitMQ and configurable process orchestration to automate bank payment reconciliation, Receive Payment creation, and invoice tagging.
- **License & Subscription Management:** Engineered a multi-tenant feature control system with timestamp-driven change propagation across distributed databases and built batch migration APIs for seamless subscription transitions.
- **Stock Adjustment & Financial Automation:** Implemented inventory adjustment workflows and payment-tagging modules, improving inventory accuracy and financial reconciliation.

GeeksforGeeks [View Articles]

Apr 2024 – Oct 2024

Technical Content Writer

Remote (Freelance)

- Authored 10+ in-depth articles on MERN stack, REST APIs, Tailwind CSS, and modern frameworks, reaching thousands of developers on the platform.
- Crafted beginner-to-advanced tutorials with real-world use cases, bridging conceptual gaps and accelerating practical learning.

Projects

TimeSathi – Project Management & Ticketing System | PHP (Yii2), GraphQL, React, MySQL

- Designed and shipped a Jira-like module, now actively used by 100+ users for daily task tracking and delivery management also used for individual reports generation for appraisal.
- Built a full GraphQL API layer in Yii2 handling all queries and mutations, decoupling frontend from backend and improving iteration speed.
- Implemented RASCI-based responsibility model across Projects, Deliverables, Releases, and Ticketing modules – enabling clear ownership and cross-team accountability.
- Engineered configurable deliverable workflows with status transitions, approval gates, and effort tracking – replacing manual Excel-based processes entirely.
- Automated stakeholder email notifications on workflow events, reducing communication lag and improving delivery visibility.

FlavourFleet – Food Ordering Web Application | React.js, Tailwind CSS, Node.js, Express.js, MongoDB [GitHub]

- Independently built a production-ready full-stack food ordering app using MERN stack, covering end-to-end architecture, API design, and deployment.
- Secured the platform with JWT-based authentication and role-based access control for users and admins.
- Designed optimized MongoDB schemas and RESTful APIs for menu, orders, and user management; built a fully responsive UI using React and Tailwind CSS.

Technical Skills

Languages: C++, JavaScript, PHP, Python, HTML, CSS, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Yii2 (MVC), Bootstrap, Tailwind CSS

APIs & Protocols: RESTful APIs, GraphQL

Databases: MySQL, MongoDB, Redis

Cloud & Infrastructure: AWS EC2, AWS S3

Message Brokers: RabbitMQ

Tools & Platforms: Git, GitHub, Postman, VS Code, Linux

Education

Bharat Institute Of Technology Meerut

Aug 2020 – Jul 2024

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.2 / 10)

Meerut, UP
